

Policy on Conflict Minerals

JMA Wireless LLC supports the fight against violence, human rights violations and environmental degradation in the mining and marketing of certain minerals (cassiterite, columbite-tantalite and wolframite, which produces gold, Tin, tantalum and tungsten) from the African Great Lakes area defined as "Conflict Region." The region includes the Democratic Republic of the Congo (DRC) and neighboring countries. Profits from the extraction and marketing of these minerals financing armed groups, contributing to the occurrence of inhumane treatment, such as trafficking in persons, slavery, forced labor and/or minors, torture and war crimes in the "Conflict Region."

The U.S. Securities and Exchange Commission (SEC) has set up a legislation tracking requirements and publication related to "Conflict Minerals", as indicated by the "Dodd-Frank Wall Street Reform and Consumer Protection Act, Section 1502" 2010. The rules require that manufacturers disclose whether their products contain "Conflict Minerals" that are "necessary for the functionality or production" of these products.

JMA Wireless LLC is committed to:

- not intentionally supply materials and components containing specified metals from mines and foundries of the "Conflict Region" that are not certified as "Conflict Free";
- ensure compliance with these requirements, to require its suppliers to undertake an adequate evaluation process with their supply chains in order to ensure that the specified metals come only from:
 - mines and foundries outside the "Conflict Region"
 - mines and smelters that have been certified by an independent third party as "Conflict Free", if located within the "Conflict Region."

JMA Wireless LLC has obtained, or is in the process of getting information from its suppliers about the origin of the minerals used in the production of gold, tin, tantalum and tungsten, used in the manufacture of components and products supplied by JMA Wireless LLC.

The aim is to ensure that products and processes purchased from being used only materials and components "Conflict Free."

In case you detect minerals extracted or processed in facilities that are not considered "Conflict Free", in any material, part or component purchased from JMA Wireless LLC, will be prepared appropriate actions in order to make the product "Conflict Free".
